Traditional Psychology
Positive Psychology

Psychology is not just about correcting errors. It’s also about building meaningful lives based on our strengths.
Is Happiness Overrated?

Study Finds Physical Benefits to Some (Not All) Good Feelings

The relentless pursuit of happiness may be doing us more harm than good.

Some researchers say happiness as people usually think of it—the experience of pleasure or positive feelings—is far less important to physical health than the type of well-being that comes from engaging in meaningful activity. Researchers refer to this latter state as "eudaimonic well-being."

Happiness research, a field known as "positive psychology," is exploding. Some of the newest evidence suggests that people who focus on living with a sense of purpose as they age are more likely to remain cognitively intact, have better mental health and
1) Positive Psychology is not about “being happy all the time”
   - Emotional experiences on a continuum
   - Happiness does not spontaneously arise when we take away unhappiness

2) Positive Psychology is not about “becoming happy”
   - It’s about “becoming happier”

10 weekly journals
“List five events from last week”
Three conditions
  - Five things you are grateful for
  - Five hassles
  - Control

Life as a Whole

Upcoming Week

Physical Symptoms
Exercise
“In a way, exercise can be thought of as a psychiatrist’s dream treatment. It works on anxiety, on panic disorder, and on stress in general, which has a lot to do with depression. And it generates the release of neurotransmitters—norepinephrine, serotonin, and dopamine—that are very similar to our most important psychiatric medicines. Having a bout of exercise is like taking a little bit of Prozac and a little bit of Ritalin, right where it is supposed to go.”

John Ratey
Does money make us happy?
American Freshman Survey

“Very well off financially”

1967: 42%
2014: 82%

“Develop Meaningful Philosophy of Life”

1967: 86%
2014: 45%
Money = Happiness?
Money = Happiness?
The Happiness Formula

Happiness = \frac{\text{What we have}}{\text{What we want}}
Money = Happiness?
Money & Happiness

-a small correlation

Happiness Level vs. Money
Assessed participants’ happiness in the morning
All given an envelope with money inside

Two conditions:
1) Personal spending:
   spend on yourself.

2) Prosocial spending:
   spend on someone else.

Happiness assessed in the evening.
Dunn, Aknin, & Norton (2008) Results

- People who spent money on others became happier

- Similar effect for spending time on other or for ourselves
Prosocial Behavior
Summary and Conclusion

1) Don’t Be Happy--Be Happier
2) Learn to Fail or Fail to Learn
3) Take time for Gratitude
4) Exercise
5) Spend time and money on others
If you believe in yourself...
And if you keep practicing...
You will get the hang of it...
And then you can get better and better at it!
Thumbs up, everybody, for rock and roll!
Thank You.
